

# Clinical Quality Assurance Compliance Oversight

## Expert Assessment of Quality Management and GCP Compliance

Advarra's customized evaluation and support services for clinical quality assurance (CQA) compliance help ensure your organization maintains appropriate compliance with applicable regulations and good clinical practice (GCP).

### The program includes:

- ✓ An on-site visit and evaluation led by an Advarra® CQA expert
- ✓ A review of your processes, quality systems, and documentation
- ✓ A comprehensive report which identifies gaps and provides recommendations tailored to your organization's size and stage of product development

## Quality Assessments for Every Phase of Development:

### Initial Review Oversight

#### Get Started with an Initial Oversight Review

Advarra's independent perspective on your current CQA program offers new insights and uncovers opportunities for improvement. Receive a comprehensive report and practical recommendations within 30 days.

### Annual or Semi-Annual Review

#### Stay Compliant with Timely Reviews

When was the last time you checked to see if your quality efforts are right-sized for your current business needs? As ongoing programs evolve and new studies begin, quality and compliance plans need to keep up with current activities.

## A Better Compliance Assessment

Our risk management assessment includes a personalized consultation with an Advarra CQA expert, who will interview staff members to understand the current processes in place and assure best practices are being followed. The team will evaluate operational aspects such as:

Clinical development oversight	Clinical quality plans	Clinical vendor oversight
Risk assessment process	Training	SOP design, administration and compliance
Site and vendor audit plans	Adherence to ICH E6R2	Inspection readiness plans

Following this assessment, you will receive a report with clear recommendations for strengthening your quality efforts. Advarra's team of experts are available to assist in implementing any of the suggested improvements to your quality program.
