

Medicare Coverage Analysis Services

Capabilities & Services Menu

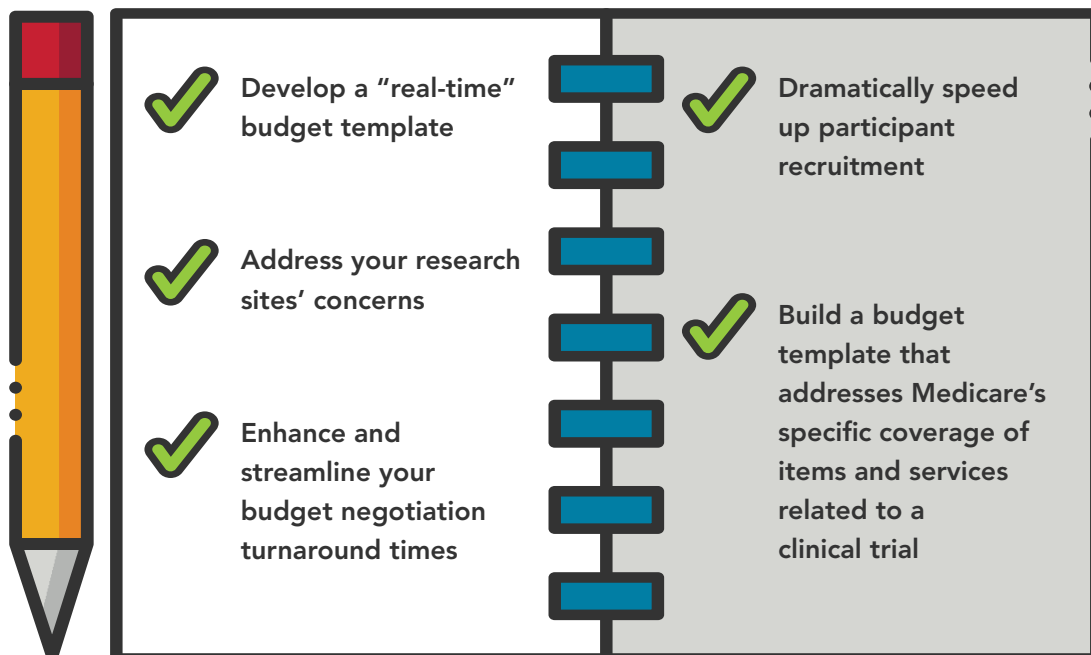

Address Medicare's unique coverage decisions and improve your research program when Advarra evaluates your drug, device, or biological clinical trial and develops a coverage analysis to help you build your budget template.

Proven Processes & Support

Proactively “level the playing field” by conducting a Medicare coverage analysis using industry best practices and all Medicare rules that impact coverage of items and services associated with a clinical trial.

Medicare Coverage Analysis

Regardless of your study's complexity, therapeutic area, or phase, Advarra is your partner to provide a customized Medicare coverage analysis.

Solutions for Sponsors

Region Specific

Take the guess work out of what is or what is not covered. Our coverage analyses address both national and local Medicare coverage determinations.

Rapid Turnaround

Our rapid turnaround times work with your critical timelines.

Custom Training

Meet your goals with tailored training programs.

Understanding of the Life Cycle of a Clinical Trial

We look at the “whole” picture and provide you with a user-friendly tool that can also assist your sites with research compliance billing concerns.

Services Menu

Comprehensive Services

- Review of study-related documents
- Mitigation of document inconsistencies (protocol, ICF, Clinical Trial Agreement)
- Current and real-life clinical trial billing determinations to assist in the development of a budget template that will encompass research sites' needs.
- Clinical trial billing education

Service Objectives

- Accelerate clinical trial activation times
- Decrease budget negotiation times with sites and prevent financial surprises
- Expedite participant enrollment
