

Technology to Streamline Your IRB Review Process

Tools to Complement Your Research Program and Operational Strategy

Advarra® delivers next-generation technology tools that automate, streamline and expedite processes related to the institutional review board (IRB) submission and review process, improving study startup timelines to help you reach critical milestones.

Proven Technology Solutions to Reach Your Milestones Faster

Advarra CIRBI Platform

The Advarra Center for IRB Intelligence (CIRBI) Platform is fully validated and compliant with 21 CFR Part 11 to give you real-time visibility and control.

IRB-Ready®

Our approach reduces the time it takes to complete your submission and enables rapid onboarding of sites — typically within a day.

IRB-Connect®

With Advarra's CIRBI Platform, you can populate IRB documents and data directly into your eTMF to automate and streamline document management.

Performance Data Quicklist (PDQ)

More than just a list of sites, our tools augment existing site databases, help identify highperforming sites and find additional sites for studies already in progress.

Through proprietary technologies and dedicated project management teams, Advarra simplifies submission, tracking and review processes while keeping you aware of progress in real time.

The Advarra CIRBI Platform

Simplify IRB Review

The Advarra CIRBI Platform offers unmatched transparency, accessibility and quality oversight. With real-time notifications and status postings, you'll always know exactly where your study is in the review process.

- Start faster with adaptive forms and saved/pre-populated submission data
- Access projects anytime, anywhere
- Be confident you're secure with a fully validated system
- Get powerful project status and site metrics that drive decisions
- Customize notifications to get exactly the information you need

IRB-Connect

Integrate the Advarra CIRBI Platform With Your eTMF for Efficiency and Quality

IRB-Connect replaces manual, error-prone document filing processes so you can manage data more effectively and increase team productivity. Our team will help you map files, indexing information and metadata directly into the correct filing structure for your eTMF.

- Improve efficiency
- Reduce administrative burden
- Streamline audit readiness

IRB-Ready

Shrink Startup Timelines

IRB-Ready promotes investigator readiness and accelerates study startup. 85% of submission data is pre-populated in the Advarra CIRBI Platform, streamlining the study submission process.

- Speed site activation to support earlier recruitment and enrollment
- Significantly shorten total IRB review approval time for all sites
- Reduce administrative burden for sponsors, CROs and sites
- Improve quality and accuracy of submissions

PDQ

Achieve More Efficient, Better-Informed Study Planning and Execution

PDQ provides sponsors and CROs detailed site performance metrics compiled from actual studies, delivering relevant insight while maintaining confidentiality. Performance analytics and dashboards can be customized.
